Improving Your Benefits Management Experience

My Admin Portal (MAP) is now live! What does that mean for you? The new [MAP](#) helps you complete most benefits-related tasks—all in one place!

By consolidating many tasks from the Institution Roster, Employee Roster, and the Medical Life Participant System (MLPS), MAP streamlines the administrative process! MAP also offers clear direction:

- Alerts you when you need to take certain actions
- Helps you understand what's needed to complete a task
- Suggests next steps once you've finished a task
- Enables you to upload documents
- Allows you to customize a personal dashboard

In addition, administrative resources, news, and eLearning are all accessible through MAP, providing the guidance, education, and timely information you need to manage your institutions and employees.

We will continue to enhance MAP to support you on your benefits administration journey in the coming years.

[Go To MAP](#)

We're also excited to announce enhancements to [MyCPG Accounts](#) that will allow employees to do more themselves—so you don't have to! Along with expanded navigation, new features will provide the ability to

- view and manage dependent information,
- manage additional personal information,
- upload documents to CPG, and
- access benefits-related information, news, and eLearning tools.

Watch this brief video for an overview of using My Admin Portal.
